

## Discover the Arboretum

Start near the main entrance (Waverley Street)

- 1) At the entrance is a statue. Who is it?

\_\_\_\_\_

- 2) When was this person alive?

\_\_\_\_\_

- 3) The first bird cage has a label celebrating a long lived cockatoo that used to live at the Arboretum.

How old was this bird when he died? \_\_\_\_\_

- 4) How many bird cages are there in the aviary? \_\_\_\_\_

- 5) You will come to a tree held up by a striped metal pole. What sort is it? Use the clues on the back of this quiz (people can eat the fruit!)

\_\_\_\_\_

- 6) What are the trees on the right (opposite side)? (clue, they have cones)

\_\_\_\_\_

*Continue on main path and then turn right up hill – past more of the same types of trees!*

- 7) What animals are carved on the old tree stump in front of you?

\_\_\_\_\_

- 8) Continue until you reach The Chinese Bell Tower and the cannons. How many cannons are there in total?

\_\_\_\_\_

- 9) In which War were these cannons captured? \_\_\_\_\_
- 10) When was this War? \_\_\_\_\_
- 11) Name one of the battles mentioned. \_\_\_\_\_
- 12) When was the Memorial built? \_\_\_\_\_
- 13) As you leave this area, there is a tree on the left with copper coloured leaves. What is it? (use clues on back)  
\_\_\_\_\_
- 14) Then we have a special type of oak tree with furry leaves and furry acorns. What sort of oak is it? \_\_\_\_\_

- 15) You will come to a statue. Who is it?

\_\_\_\_\_

- 16) When was the statue put here?

\_\_\_\_\_

- 17) Further ahead is a tree with baby conkers on it. What is the proper name for this tree? (use clues on back)

\_\_\_\_\_

- 18) Then *follow path in front of tunnel and up to corner* – what sort of trees are these? (some are copper coloured again). Squirrels love their nuts!

\_\_\_\_\_

- 19) Further along on left are trees with small leaves and silver trunks. What are these? (clue – named after colour of their bark!)

\_\_\_\_\_

- 20) Continue until you come to a tree on left with big long toothed leaves. What is this? (clue – people can eat the nuts from this tree!)
- 

- 21) Then you will come to a junction where there is a tree with big leaves that turn bright red in the autumn. Guess what - this is a red oak! Turn right and follow path past band stand. How many seats are there on right in front of fence?
- 

*You will then pass two more red oaks (on right) and another tree that has conkers on the left. Go straight on. Then you will see an unusual tree with leaves that are almost straight at their tops – almost tulip shaped. Guess what – it is a Tulip Tree!! They are quite rare!*

On the right is a carved tree trunk with a bearded face on it.

- 22) What number is carved at the top? \_\_\_\_\_  
(clue - this celebrates an anniversary of the Arboretum a few years ago)

- 23) Follow path straight ahead and down the hill along the edge with street. Straight opposite, what is the name of the street on the sign?
- 

- 24) You will come to a massive tree on the left with big leaves. This tree is commonly grown in places like London and in many parks (clue – its name is the same as something that can fly!)
- 

- 25) Then take path that goes left past the flower beds. This is the Victorian flower garden. How many round flower beds are there?
- 

- 26) Return back to the start. Now look at the main notice board telling you about the Arboretum. What does the word 'Arboretum' actually mean?
- 

- 27) Last question! In which year was the Nottingham Arboretum first opened?
-
